

Transportation Officials in 1995. He was also Chairman of the Board of Directors of the Intelligent Transportation Society of America from 1998 to 1999 and continues to serve on the Board. In addition, he became Chairman of the Executive Committee of the Transportation Research Board of the National Research Council in January, 1999 and was a member of the President's Council on Year 2000 Conversion.

He has earned many national and state awards, including the Key Citizen of 1996 Award from the Georgia Municipal Association. In September, 1997, the State Transportation Board dedicated the Transportation Management Center in Atlanta as the Wayne Shackelford Building.

The Georgia DOT has also won many top national awards under Commissioner Shackelford's leadership, including the top national awards for asphalt and concrete paving for 1996 and the top quality construction awards from the National Asphalt Paving Association in 1997 and 1998. Georgia has been rated for two consecutive years—and for many of the past 15 years—as having the best-maintained roads in the nation.

For these and many other achievements it is my great pleasure to commend Commissioner Shackelford, to thank him for his many years of hard work and dedication on behalf of the people of Georgia, and to wish him well in all his future endeavors.●

TRIBUTE TO DR. NANCY FOSTER

● Mr. HOLLINGS. Mr. President, it is with the most heartfelt sadness that I rise today to commemorate the life of Dr. Nancy Foster, who passed away Tuesday at her home in Baltimore, Maryland. As I stand here today I recall that only a year ago I spoke to you about Dr. Foster's outstanding work as head of the National Ocean Service at the National Oceanic and Atmospheric Administration. The news of her passing was bitter pill. Not only was Dr. Foster a dedicated and visionary public servant, but she was also universally admired and loved. I know that her creativity, boundless energy, and compassion will be sorely missed both here and at NOAA. Dr. Foster's efforts in my home state of South Carolina both as head of NOS and then at NOAA's Fisheries Service were testaments to her skill at bringing groups together to solve incredibly complex coastal problems, from protecting our sea turtles to conserving and understanding our precious coastal resources. The world is a better place for her having served here with us.

Dr. Foster came to NOAA in 1977 and spent her career promoting programs to explore, map, protect and develop sustainably our Nation's coastal and fishery resources. She helped create the National Marine Sanctuary Program and Estuarine Research Reserve Program. These programs preserve America's near shore and offshore ma-

rine environments in the same manner as do the better known national parks and wildlife refuges on land. Nancy went on to serve as the Director of Protected Resources at NOAA's Fisheries Service, where she managed the Government's programs to protect and conserve whales, dolphins, sea turtles and other endangered and protected species. After that, Dr. Foster was named the Deputy Director of the Fisheries Service, where she forged alliances between fishing and conservation groups to ensure both the protection of our living marine resources and the sustainability of our human resources. I particularly recall her special efforts in South Carolina, where she worked hand in hand with our shrimpers to help them devise ways of keeping sea turtles out of their nets.

In 1977, Commerce Secretary Bill Daley and NOAA Under Secretary Jim Baker tapped Nancy to take over the National Ocean Service. Not only was she the first woman to direct a NOAA line office, but she was given one of the most senior levels a career professional can achieve; in other agencies or bureaus, such a position would be reserved for at least an Assistant Secretary-level official. NOS has the longest running mission of all the NOAA line offices—coastal mapping traces its lineage back to 1807—and she pioneered a reinvention effort that has made the Ocean Service one of the most modern and effective of the line offices. A proven innovator, she directed the total modernization of NOAA's essential nautical mapping and charting programs. In addition, along with Dr. Sylvia Earle she created a ground-breaking partnership with the National Geographic Society to launch a 5-year undersea exploration program called 'Sustainable Seas Expedition.' to rekindle our nation's interest in the oceans, and especially the national marine sanctuaries. This effort has sparked the kind of enthusiasm about the oceans that Jacques Cousteau created when I first came to the Senate.

While the Federal Government frequently recognized Dr. Foster's contributions through numerous important awards, she was also a person whom the rank and file employees at NOAA—the marine biologists, researchers, and managers—trusted and admired. She was a strong and enthusiastic mentor to young people and a staunch ally to her colleagues. She has, and always will, serve as a role model for professional women everywhere, especially those who work in the sciences. Nancy Foster was that rare official whom we in the Congress looked to for leadership, candor, and sensitivity, and we will all feel her loss deeply for years to come. I would like to offer my deepest appreciation for Dr. Foster's outstanding contribution to the Nation and send my sincerest condolences to her family and friends.●

NATIONAL DAY OF PRAYER

● Mr. ALLARD. Mr. President, on May 4, 2000 those attending the National Day of Prayer luncheon in Denver, Colorado got to hear an electrifying talk by Dr. Condoleezza Rice. I found the speech so moving, so inspiring that I wanted to share it with those who could not be in attendance that day to her remarks. "Condi," as she likes to be called, grew up in Denver, graduated Magna Cum Laude from Denver University and has served our country in many ways including service to former President George Bush as a chief expert on Russia. I ask that her speech be printed in the RECORD.

NATIONAL DAY OF PRAYER, DENVER,
COLORADO, MAY 4, 2000

(By Dr. Condoleezza Rice)

Thank you very much. It is indeed a delight to be with you here in Denver for the Colorado Prayer Lunch. I do know quite a few people in the room, and there are good friends here from very far back in my history. I'm not going to tell you who they are because I don't want you to go up to them and ask them how I really was at fifteen or sixteen years old. But it's awfully nice to back here—home in Denver.

I bring you greetings from my family. My parents and I moved to Denver when I was twelve years old, and this is just a great place to live. I think the reason that it is such a great place to live is events like this. You look around and you see the love in the community, you see the strength in the community. It's nice to be back.

When I thought about what I'd like to talk with you about, I immediately reflected on the fact that this is of course our National Day of Prayer as well as the day for the Colorado Prayer Luncheon. And I thought about spending a few minutes with you talking about the relationship of personal faith, to faith in a community, to strength and forward movement in a community. Because very often we think about where we would like the community to go, we think about where we would like our leaders to take us. We very often forget that strong communities are built person by person, step by step, by the responsibility of each and every one of us. That responsibility and that strength, I believe, can come from many different sources, and certainly it comes from different sources for different people. But for many of us, and perhaps for most of the people in this room, it certainly relates to deep and abiding faith in God, whatever one's religious background. For me it comes from a deep and abiding faith in Jesus Christ.

Now I have to tell you that I was born into the church. I didn't have much choice. In fact, on the day that I was born which was a Sunday, at 11:48 my father was preaching a sermon. He had been told on Friday night that his child probably wasn't going to be born for a couple of days, so go ahead on Sunday and preach the sermon. And my goodness when he came out of the pulpit on Sunday, he had a little girl.

We lived in the back of the church until I was three and then moved into a parsonage. My grandparents were religious people. I studied piano from the age of three. I could read music before I could read. But the first song that I learned was "What a Friend We Have in Jesus." And then I learned to play "Amazing Grace," etc. etc.

My grandfather was a deeply religious person. Indeed I have a lot of heroes in my life, but Granddaddy Rice is perhaps the most remarkable because you see back in about 1920
